POISON SAFETY ON HALLOWEEN

Tips from the poison experts at the Maryland Poison Center

Do not chew on or open glow sticks.

Bloomed chocolate is safe to eat.

While non-toxic, the liquid can irritate the eyes, mouth, and throat.

The white coating is caused by temperature changes.

Poisoned candy is a myth.

Wear gloves to handle dry ice.

Investigated cases of suspected poisoned candy reveal some other health concern.

Dry ice can cause burns if handled directly.

If needed, call the poison experts.

Use non-toxic makeup and face paint.

Pharmacists and nurses answer the phone 24/7/365.

Although non-toxic, they can still irritate the skin and eyes.
